

What Are Cookies?

A cookie is a small file, often including a unique identifier, that is sent to your device's browser from a web server and is stored on your device's hard drive.

They are widely used in order to make websites work, or work more efficiently, as well as to provide information to the owners of the site. Each website can send its own cookie to your browser if your browser's preferences allow it, but (to protect your privacy) your browser only permits a website to access the cookies it has already sent to you, not the cookies sent to you by other websites. Many websites do this whenever a user visits their website in order to track online traffic flows.

How to control and delete cookies

Woodlands Primary School will not use cookies to collect personally identifiable information. However, if you wish to restrict or block cookies, you may do so through your browser settings. This information should be available from your help menu inside your browser. For further information on cookie removal and other cookie related subjects, please visit www.aboutcookies.org.

While considering these matters, please be aware that restricting cookies may impact the functionality of this website.
